PROFILE

Full-stack developer with 6+ years of experience leading React/Next.js and NestJS apps for global clients. Expert in scalable architectures, maintainable UIs, and cloud-native modernization with measurable UX and performance results.

KEY SKILLS

Frontend: React, Next.js, React Native, TailwindCSS, Redux Toolkit, MUI

Backend: NestJS, Node.js, FastAPI

Cloud/DevOps: AWS Lambda, Azure, GCP, CI/CD

Databases: PostgreSQL, Firebase, DynamoDB

Other: Git, Figma, Agile (Scrum)

Languages: English (native), Spanish (native), Italian (intermediate)

SELECTED PROJECTS

- **Modular Dashboard (Microfrontends)** — Built a Webpack Module Federation dashboard with independent deployments for analytics and user management.
 - **Injectable React Widgets** — Integrated React components into WordPress and legacy sites via iFrames.
 - **Logistics Automation Backend** — Automated report syncing with Google Drive using FastAPI; cut manual entry by over 60%.
-

EDUCATION & CERTIFICATIONS

- Certified TypeScript / JavaScript / Python Developer (Self-Taught, 2020–Present)
- Advanced React Patterns, TypeScript Mastery (Udemy / Frontend Masters)
- Continuous learning: Zod Schemas, SolidStart, rTPC backend design, FastAPI + Django best practices

PROFESSIONAL EXPERIENCE

Cordova Solutions – BigIron (Remote, USA) · *Frontend Lead* · 2025–Present

U.S.-based agricultural marketplace modernizing its ASP.NET platform.

- Led UI modernization across desktop and mobile, introducing a scalable TailwindCSS design system for consistent styling.
- Refactored legacy Razor views and shared components, improving maintainability and responsiveness.
- Partnered with UX and backend teams to define a future-ready React migration architecture and streamline frontend workflows.

InTech Ideas (Panama / Remote) · *Lead Developer* · 2024–2025

U.S.-based Real Estate giant migrating and integrating a new e-signature platform.

- Developed and maintained production components for a large-scale React/NestJS SaaS platform hosted on Azure.
- Integrated RabbitMQ message queues to improve event-driven communication and system reliability.
- Enhanced CI/CD pipelines and deployment automation, improving rollout efficiency and developer velocity.

Y-GO Logistics (Panama) · *Freelance Full-Stack Dev* · 2023–2025

Panama-based package logistics platform seeking to modernize its user-management platform.

- Built package-tracking web app (Next.js + FastAPI).
- Automated invoice and file workflows; reduced manual operations 60%.

Webtronic Labs (Remote, U.S.) · *Full-Stack Dev* · 2022–2024

U.S.-based Startup with several projects, including AI chatbots and React Native applications.

- Created React Native event app + AWS Lambda backend.
- Enhanced chatbot DB queries; lowered app latency 30%.
