

FELIPE ICAZA

Senior Full-Stack Software Engineer · React / Next.js / TypeScript / Node.js

Open to Alberta (Calgary / Edmonton) and GTA · +1 (647) 491-1614 · felipeicaza@gmail.com · felipeicaza.dev · linkedin.com/in/felipe-icaza · github.com/ficazam

Eligible for Canada's Global Talent Stream (fast-track relocation)

PROFILE

Senior Full-Stack Software Engineer with 6+ years of experience shipping and maintaining production systems in delivery-focused environments. Specialized in React/Next.js, TypeScript, Node.js, and PostgreSQL, with hands-on Python, AWS, and CI/CD experience. Known for owning systems end-to-end, stabilizing legacy codebases, and delivering under tight timelines. Currently expanding into AI agent infrastructure: multi-agent orchestration, MCP server development, and production eval systems.

KEY SKILLS

Frontend:	React · Next.js · TypeScript · JavaScript · TailwindCSS · MUI
Backend:	Node.js · NestJS · Express · Python
AI / Agents:	Anthropic SDK · MCP (server + client) · multi-agent orchestration · tool use · evals
Infrastructure:	AWS Lambda · Azure · GCP · CI/CD · Docker
Databases:	PostgreSQL · Supabase · DynamoDB · Firebase
Testing:	Jest · Pytest · Unit & integration testing
Tools:	Git · Agile/Scrum · Jira · Confluence · System design · API integrations

SELECTED PROJECTS

Aelisse — Autonomous Multi-Agent Engineering System

TypeScript · Bun · MCP · Anthropic SDK · github.com/ficazam/aelisse

- Built a multi-agent CLI that autonomously onboards itself into any codebase.
- Orchestrator delegates to three role-scoped subagents (Explorer, Analyzer, Writer) via a custom MCP filesystem server with per-agent tool access controls.
- Generates context docs, scoped rule files, skill libraries, and QA manifests. Ships with a three-suite eval system (output, settings, skill validation).

Alumni Directory — Full-Stack Platform

React · Next.js · NestJS · Supabase

- Built multi-tenant platform end-to-end: auth, admin tools, search, file management, and backend modules.

Contract-First HTTP Client (Open Source)

TypeScript · Zod · npm

- Strict, contract-driven HTTP client enforcing API correctness at compile time; runtime schema validation + compiler-level misuse prevention.

Logistics Automation System

Next.js · FastAPI · PostgreSQL

- Automated invoices, tracking, and file workflows; cut manual ops ~60% and improved system reliability.

PROFESSIONAL EXPERIENCE

InTech Ideas (Remote, USA) Senior Full-Stack Engineer	Nov 2025 – Present
• Leading refactors and upgrades of a Next.js frontend serving thousands of users — improving performance, maintainability, and developer velocity. • Supporting modernization of a Python/Django backend for improved reliability and long-term scalability. • Collaborating with product, engineering, and operations teams to deliver features on tight timelines.	
Cordova Solutions – BigIron (Remote, USA) Frontend Lead	2025
• Modernized legacy ASP.NET/Razor views and shared components; improved consistency and maintainability. • Introduced TailwindCSS design system; reduced UI maintenance overhead and improved developer velocity. • Collaborated with backend/UX to define a migration path toward a React-based platform.	
InTech Ideas (Remote, USA) Lead Developer	2024 – 2025
• Built production React/NestJS features used daily by thousands of users on a U.S. Real Estate e-signature SaaS. • Integrated RabbitMQ for reliable event-driven communication across services. • Improved CI/CD pipelines and deployment automation, reducing rollout failures.	
Y-GO Logistics (Panama) Freelance Full-Stack Dev	2023 – 2025
• Built a package-tracking platform with Next.js + FastAPI. • Automated imports, invoice processing, and file workflows — 60% less manual work.	
Webtronic Labs (Remote, USA) Full-Stack Dev	2022 – 2024
• Delivered React Native event application with AWS Lambda backend. • Improved chatbot query performance 30% through DB and query optimizations.	

WORK AUTHORIZATION

Eligible to work in Canada via employer-supported work permit (Global Talent Stream — fast-track). Available to start remotely immediately; can relocate within 3–4 weeks.

EDUCATION & CERTIFICATIONS

Self-Taught Software Engineer · English (native) · Spanish (native) · Italian (intermediate)	
Anthropic Certifications (March 2026):	
• Claude with the Anthropic API — verify.skilljar.com/c/dxnwn736gfz3 (Mar 2026) • Introduction to Model Context Protocol — verify.skilljar.com/c/4vcxui3mvcup (Mar 2026) • Introduction to Agent Skills — verify.skilljar.com/c/53qfzt4md95c (Mar 2026) • Claude Code in Action — verify.skilljar.com/c/ren5bjo3t6t2 (Mar 2026)
