PROFILE

Senior Full-Stack Software Engineer with 6+ years of experience delivering and maintaining production systems in enterprise and delivery-focused environments. Strong background in TypeScript, NestJS, React, and Python, with a proven track record modernizing legacy platforms, owning core services, and shipping reliably under tight timelines. Comfortable operating as an independent contractor or transitioning into long-term roles.

CORE SKILLS

Frontend & API Integration

TypeScript · JavaScript · React · Next.js · REST APIs · UI Architecture

Backend & Services

NestJS · Node.js · Python (FastAPI, Django) · Microservices

Platform & Delivery

CI/CD · Docker · Cloud Platforms: AWS · Azure · GCP · Agile / Scrum

Data & Tooling

PostgreSQL · Supabase · DynamoDB · Firebase · Git · Jira · Confluence

SELECTED PROJECTS

Contract-First HTTP Client (Open Source) — TypeScript, Zod

- Designed and published a contract-driven HTTP client enforcing API correctness at compile time.
- Combined runtime schema validation with strong type safety; tested and distributed via npm.

WORK AUTHORIZATION

Eligible for employer-supported Canadian work permit (Global Talent Stream).

Available to start immediately as an independent contractor; relocation possible within 3–4 weeks.

PROFESSIONAL EXPERIENCE

InTech Ideas (Remote, USA) · Senior Full-Stack Engineer · 2025–Present

Large-scale consumer platform serving thousands of users.

- Leading refactors and upgrades of a Next.js frontend to improve performance, maintainability, and developer velocity.
- Supporting modernization of a Python/Django backend, improving reliability and long-term scalability.
- Working closely with product and operations teams to deliver features on tight timelines in a production environment.

Cordova Solutions – BigIron (Remote, USA) · Frontend Lead · 2025

U.S.-based agricultural marketplace modernizing its ASP.NET platform.

- Led modernization of a large legacy UI using TailwindCSS, improving consistency and delivery speed.

InTech Ideas (Remote, USA) · Lead Developer · 2024–2025

U.S.-based Real Estate giant migrating and integrating a new e-signature platform.

- Delivered production React and NestJS features used daily by thousands of users.
- Integrated RabbitMQ for reliable event-driven communication across services.
- Improved CI/CD pipelines and deployment automation, reducing rollout failures.

Y-GO Logistics (Panama) · Freelance Full-Stack Dev · 2023–2025

Panama-based package logistics platform seeking to modernize its user-management platform.

- Built a package-tracking platform with Next.js + FastAPI.
- Automated imports, invoice processing, and file workflows (60% less manual work).
- Improved overall system stability and operational visibility.

Webtronic Labs (Remote, USA) · Full-Stack Dev · 2022–2024

U.S.-based Startup with several projects, including AI chatbots and React Native applications.

- Delivered React Native event application with AWS Lambda backend.
- Improved chatbot query performance by 30% through DB and query optimizations.

Remote / Panama / North America · Full-Stack Dev · 2019–2022

Freelance Full Stack Development Work for Several Clients.

- Delivered end-to-end full-stack web applications for small businesses and startups, building React / Next.js frontends and Node.js / Python backends with REST APIs, authentication, and relational databases.
- Owned projects from requirements through deployment, working directly with stakeholders and deploying production systems using AWS/GCP, Docker, and CI/CD pipelines.
